

Matthew Florek

matthew.florek03@gmail.com ❖ (949) 353-2263 ❖ [LinkedIn](#)

Quick-learning early career data professional exhibiting mastery of Excel, SQL, PowerQuery, data engineering concepts, and AI workflows ready to hit the ground running on day one.

SKILLS & CERTIFICATIONS

Data Tools & Programming: SQL, Microsoft Excel, Python, Pandas, Power Query (M), Excel Power Pivot, Pivot Tables, QGIS, Access, Tableau, Airtable, RapidMiner, Microsoft Power Apps, Microsoft Power Automate Desktop & Cloud, OpenAI Codex, Jupyter Notebook, Microsoft Office Suite

Data Architecture & Engineering: Relational database design, data lake & lakehouse architecture, dimensional modeling (star/snowflake), data transformation, OLTP vs OLAP concepts, business rules implementation, ETL/ELT pipelines

AI-Accelerated Development: Highly skilled in AI-assisted coding workflows for Python and Power Query, including transformation logic, interpreting generated code to verify safety & usability, and iteration to production-ready solutions. Highly familiar with RAG and agent orchestration concepts.

Analytics & Finance: Financial modeling, variance analysis, FP&A concepts, projections, cost accounting, scenario modeling, and business process automation expertise

Communication: Excellent oral & written communication skills including technical writing & documentation and presentations

Certifications: SQL for Data Science, UC Davis Extension, 2023

EDUCATION

Northern Arizona University | Graduated December 2024

Bachelor of Science in Finance with Business Analytics Certification

- Placed #1 out of 3100 students on the ETS Business Major Field Test at the W.A. Franke College of Business
- Dean's List 2023
- Advanced coursework in Finance concepts, Data Warehousing, SQL, R, SAP, Tableau, Statistics, Logistics, and risk management

WORK EXPERIENCE

Grants Data Analyst

April 2025 - Present

Arizona Department of Education

Phoenix, AZ

- Managed departmental data flows to ensure institutional compliance with government legislation and policy
- Created Power Automate solutions to vastly simplify business processes, using cloud and desktop flows to save hundreds of hours and eliminated a key manual workflow that used to require a team working for two weeks
- Planned and executed district boundary changes using QGIS software for submission to the US Census Bureau
- Created a comprehensive data dashboard in Microsoft Excel for leadership decisions using complex Power Query transformations and SQL Server data sources, eliminating 30 hours of work per week
- Built relational data structures and lookup schemas in Excel when legacy constraints prevented database use, and constructed automated multi-source Power Query pipelines to support data reporting
- Utilized AI tools to generate useful code to revolutionize data accessibility
- Wrote and maintained SQL queries to provide management with vital data for decisionmaking
- Prepared regular adhoc reports to support business operations unit
- Created and maintained extensive technical documentation within Business Operations Unit
- Investigated & identified data integrity issues from school district data submissions
- Worked with cross-functional teams to achieve critical business goals

Data Analyst Intern

May 2024 – August 2024

Neuromemex

San Francisco, CA (Remote)

- Annotated neuroinformatics database in Airtable
- Managed data quality and data hygiene, corrected master data records
- Analyzed data with Excel pivot tables

AI Data Annotator

March 2024 – August 2024

Dataannotation.tech

San Francisco, CA (Remote)

- Engaged in RLHF fine-tuning of AI language models to achieve higher quality responses
- Graded model responses on a variety of qualitative metrics
- Engineered AI prompts designed to test the limits of the technology and provide useful insight
